11. Cocordia Agri Trading PTE ltd
12. Noble Resources PTE Ltd
13. COFCO Agri PTE Ltd.
14. GAHTANI INTERNATIONAL MARITIME AGENCY

The History:

GH, a joint venture company was founded by the Late Sheikh Hassan Abdul Karim Al-Gahtani in 1975 in partnership with Geosource Incorporation of the United States of America. In early 1980's, Geosource Management decided to withdraw their investments from Saudi Arabia and after mutual agreement the HAK Group of Companies (the parent company of GH TL) acquired the remaining 49% share of the partnership to form a fully Saudi owned company.

The New Beginning:

During the 1970's, Saudi Arabia was undergoing an industrial revolution with modern infrastructure being built to meet the growing oil and gas industry and other support services that created a vacuum for much needed transport services. GH started its humble beginning by supporting this sector and playing its part in the industrial development phases by catering to the transportation and logistics requirements in Eastern Province of the Kingdom.

Since its inception, with just a few trucks GH Management realized the importance of this growing sector and imported large quantities of Mack Trucks from USA and soon the newly acquired fleet were seen servicing the fast growing industries. After establishing Transport & Logistics contracts with the then Arabian American Oil Company (Aramco) and servicing their Onshore Exploration, Pipeline and Material Supply Division projects, transporting approximately Seven (7) million tons of raw materials and in the process GH became a name of professionalism, strength and reliability gaining the tag as one stop shop for their logistical requirements and transport solution.

The Diversification and Expansion:

As the industrial boom was spreading out to different development sectors, GH decided to diversify and expand their operations to the upcoming needs in Government and Private Industrial Development Industry, with opening of branches in Riyadh, Jeddah, Jubail and Yanbu, dedicated divisions specializing services such as Oil, Gas and Water pipes transport measuring 120 Kms in length, support services to the US Corps of Engineering to transport their raw materials and equipment's. Further to support the heavy construction carried out to build refineries and GOSP's the GH Heavy Lift Division was formed.

Oil & Gas Services

BULK

To meet the demands of an ever increasing influx of foreign labor force and growth within local populace there was an urgent need for expansion of agricultural farming and cattle industry development, and thus GH started the GH Bulk Division that would till date support the Saudi Sea Ports of Jeddah and Dammam to cater to the growing number of farms, animal husbandry and bulk imports throughout the Kingdom

Later on as a part of the diversification plans the common carrier and Xpress divisions were developed not just to cater to big names in the developing industry but also to the transport needs of small scale support industries.

GHXPRESS

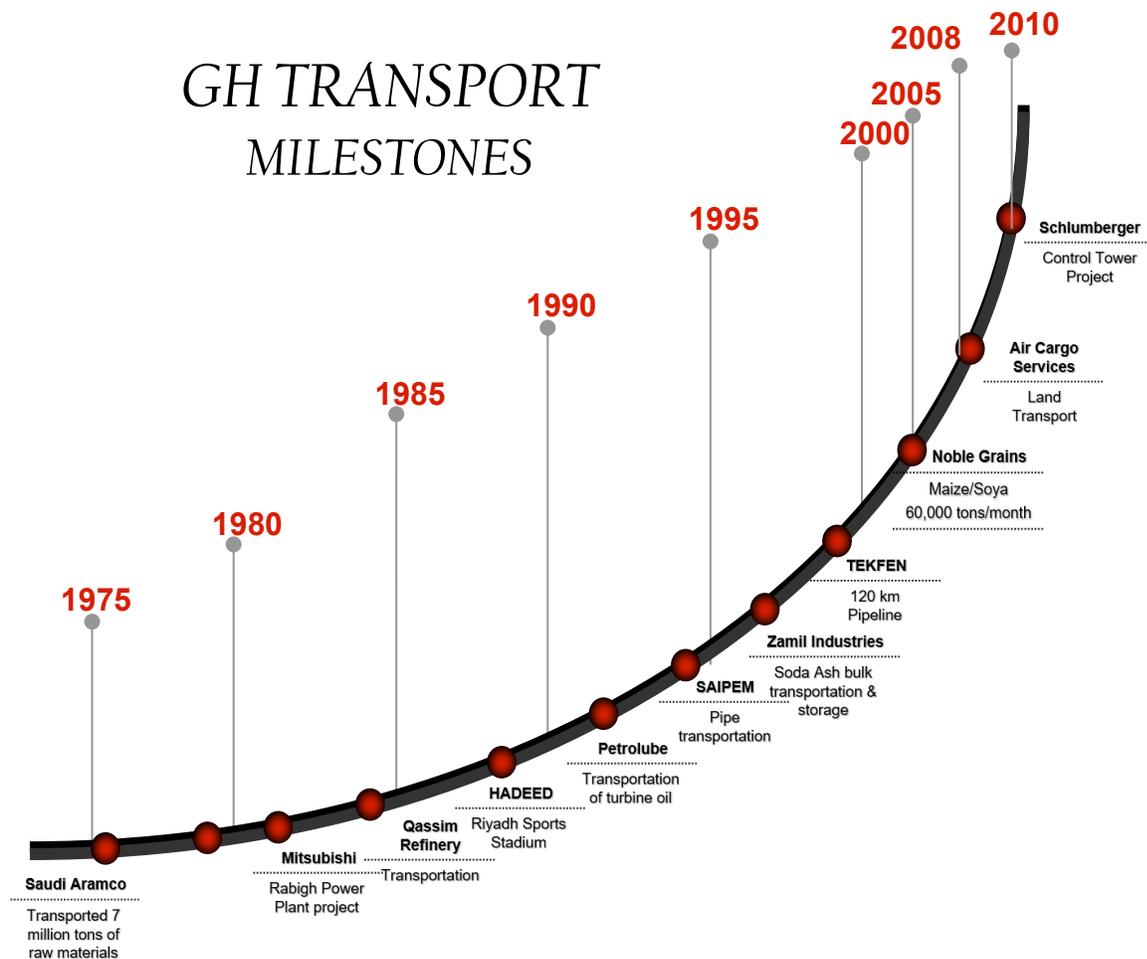

IFS

Finally, to support the airline industry to cope with growing needs of export and import of personal effects as well as the commercial goods, GH transport established the IFS (International Freight Services) division.

GH Today:

With changing business demand trends and in order to keep abreast of the ever evolving transportation sector, GH has modified and streamlined its business activities in a flexible and accommodative logistics and warehousing systems in place with four dedicated divisions servicing different sectors that offers a broad portfolio of integrated services and custom-tailored and customer focused solutions for the management and transport of goods.

Our divisions work hand in hand so that we can flexibly fulfill all our customer's logistical requirements. This enables us to systematically tap the opportunities offered by the trends towards globalization and outsourcing services.

GH OILFIELDS & GAS SUPPORT SERVICES Division (OGS):

With the beginning of the exploration activities by International Oil Companies in collaboration with Saudi Aramco in the Empty Quarter desert of Saudi Arabia in 2005. GH was awarded the Integrated Project Management (IPM) by Schlumberger Middle East for South Rub Al-Khali (SRAK) project (collaboration between Total and Saudi Aramco) to transport all raw materials, drilling equipment, cement and skip transport services from its base in Dammam to Ishrat-

1 deep inside the Rub Al-Khali (Approximately 250 kms from Sharourah into the Empty Quarter) and to various other locations.

Using specialized 6x4 axle trucks that can endure the treacherous desert trips, each truck is installed with the latest IVMS system and is monitored by the Global Journey Management Center that requires following strict oilfield industry driving and safety norms. Drivers have to undergo safe driving practice training and are certified by Schlumberger Training Department to be eligible to work on the project.

Based on our service excellence and as a registered and preferred transport service provider, we have been providing dedicated crew change transport services to Schlumberger GeoServices (previously collaboration between Lukoil of Russia and Saudi Aramco – LUKSAR) since 2005 and to date with Schlumberger Geoservices.

Currently, supporting the Control Tower Project with Tractor Heads and 40 feet flat bed trailers to transport materials, drilling equipments & tools and assisting crew changes to various rig site locations all over Saudi Arabia.

All trucks are fitted by IVMS and only assigned to trained and certified drivers, with daily journey management plan implemented, Vehicle inspection, Driver condition evaluation and Communication between Dispatcher and Driver on every Two (2) hours driving break.

We have implemented and follow stringent QHSE policies and procedures, with Reward & penalties system in place.

All assigned drivers to Schlumberger project are medically tested every two (2) years.

In 2007 GH was adjudged as the Best Service Provider Contractor by Schlumberger.

GH BULK Division:

Bulk division is one of GH Transport's major division under contract with Trans-Continental Shipping Agencies, handling all their import shipments of Corn, Soya Bean Meal, Soda Ash, Sugar Beet and Sodium Carbonate that arrive on vessels from different continents to the Jeddah Islamic Port and King Abdulaziz port in Dammam.

With a large number of dedicated fleet of trucks/tippers and 24 X7 operations with a capacity of handling approximately 65K tons of grain per month, the imports are offloaded from the vessels and either directly transported to the client's farms or transported from the Ports into our warehouse with a total storage facility measuring 35K Sq meters and thereafter partial quantities delivered as required by the clients.

Apart from the above, bulk division is specialized in transporting minerals such as bentonite, barite etc in bulk, bag and containers.

GHXPRESS Division:

This division was established to cater to the growing need industries to move packages, parcels and palletized cargo between the fast developing cities such as Dammam, Jeddah and Riyadh. The highlight of this division is to handle palletized materials, equipment, parcels and packages with today collection and next day deliveries at the required destination for Dammam and Riyadh, Jeddah receives similar pick-up and deliveries within 48 hours. With the use of curtain-side trailers to run the inter-city distance into GH Branch offices, thereafter deliveries are made by medium sized trucks to their destinations. Today the Xpress division caters to more than 200 customers dealing with all sort of cargoes such as pallets, packages, equipment's, chemicals, containers, pipes, steel etc. delivered across all key locations in the Kingdom of Saudi Arabia.

GH INTERNATIONAL FREIGHT SERVICES Division:

With the demand to transport air freight cargo to airline hub destinations, this division is authorized by airlines to receive cargo shipments from small commission based cargo agents and to security screen each cargo for hazardous or banned materials, after sorting and consolidating them to be loaded onto our trailers and transported to the airline hub in Bahrain, Doha, Kuwait and Dubai for onward air cargo. We are contracted by major airlines i.e., Gulf Air, Saudi Arabian Airlines, Qatar Airways, Kuwait Airways, Emirates, etc., just to name a few.

Our Airline Partners

GH WORKSHOPS:

In order to keep the huge number of trucks well maintained and running, GH has its own workshop with Mechanical, Electrical, Denting, Painting, Welding & Trailer Shop and Tyre shop in Dammam, with support branch workshops in Riyadh and Jeddah.

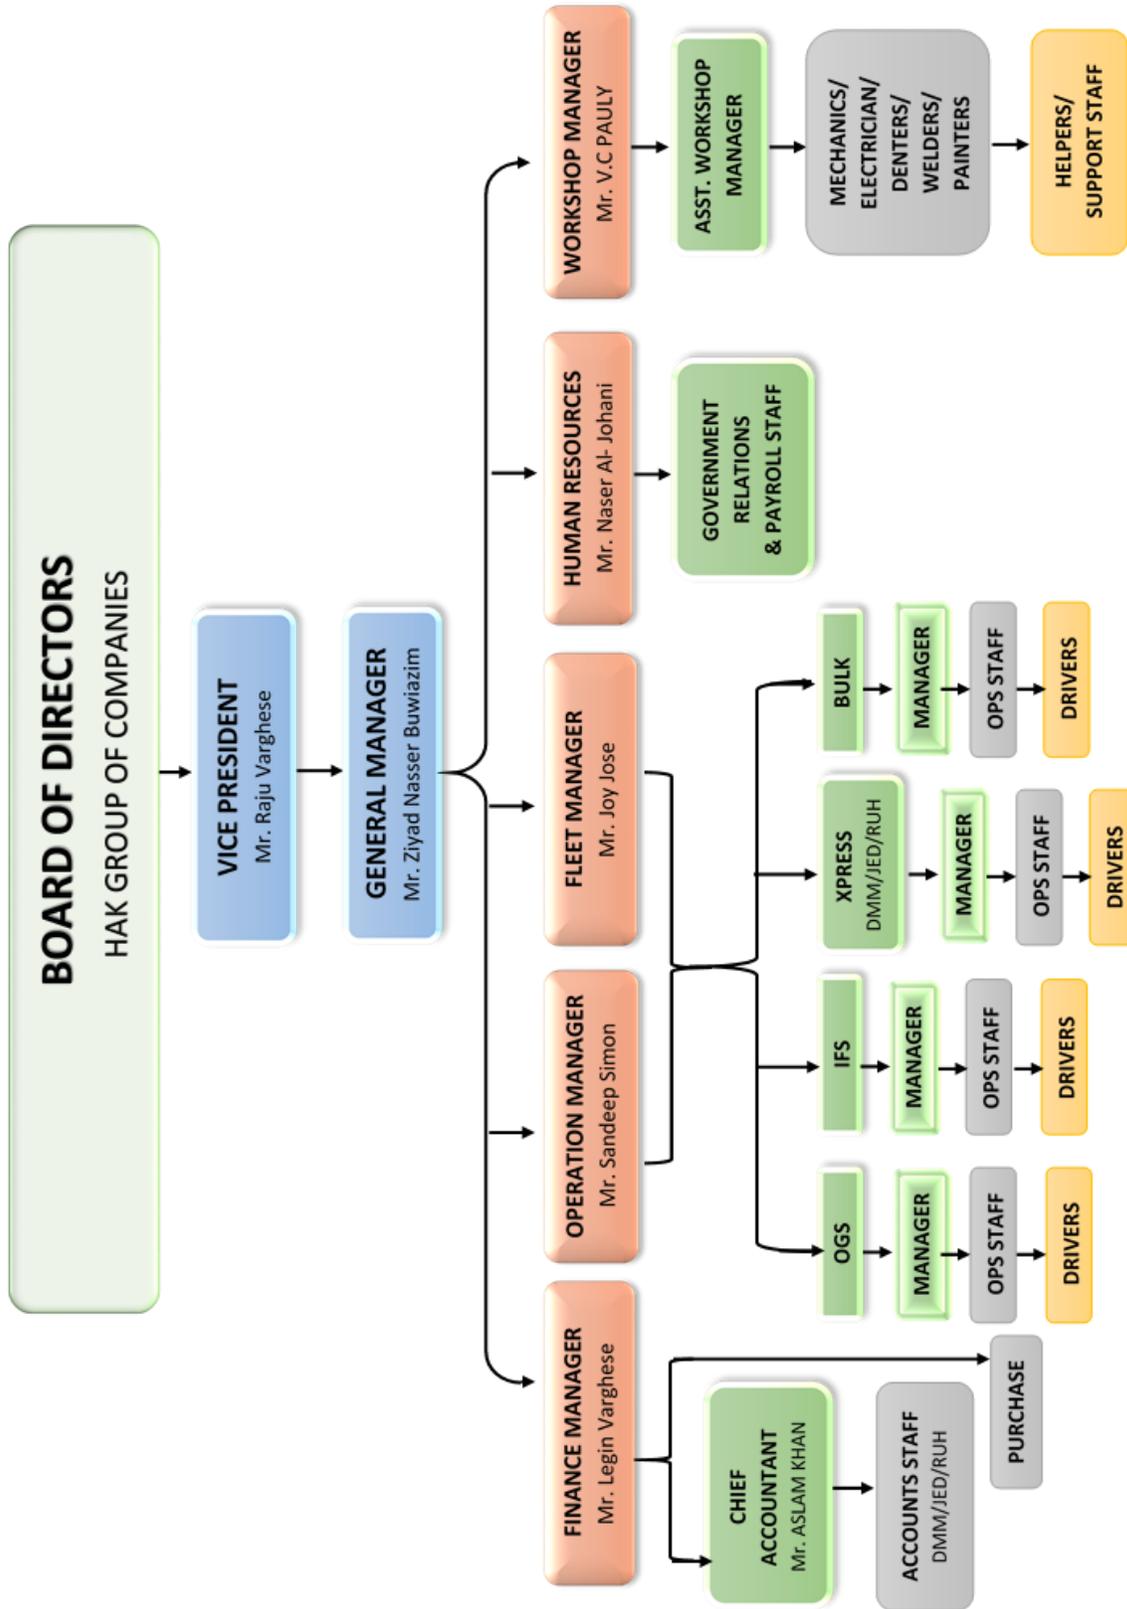

Equipped with a team of expert mechanics and technicians, two wreckers and three Road-Call Support Vehicles, the fleet are maintained in-house under strict supervision and quality check inspection. GH maintenance capabilities include truck/vehicle repair, full engine rebuild services, welding and fabrication services, electrical repair, trailer repair, denting and painting services, as well as complete tire shop capabilities.

It is believed that by keeping maintenance in-house, GH can better control the quality of maintenance services.
